HERE ARE A FEW TIPS ON ROAD SAFETY,

KEEP YOUR VEHICLE IN A GOOD CONDITION

If the vehicle has any kind of fault, it can cause an accident. So, always keep proper maintenance of your car, motorcycle, or any other vehicle that you own so that you can avoid accidents.

TRAINING

Before getting behind the wheel, get a learning driving license and try to learn driving from reputed schools. If the driver is untrained, he could cause a crash on the road.

WEAR SEATBELT

Wearing the seatbelt is critical. Always wear it as it prevents you from hitting the windshield, steering wheel, doors, etc. It prevents passenger ejection during a severe accident.

LOOK AROUND BEFORE CROSSING THE ROAD

Always look on both sides of the road before crossing it. Many people cross the road without even looking around themselves, which causes accidents.

FACE THE TRAFFIC

When you are on the road, you should be visible to everyone and keep an eye on everything. As a pedestrian, you should be visible to everyone on the road.

MAKE EYE CONTACT

Don't just look at the vehicles while walking on the road, but also make eye contact with the drivers. There is a chance that the driver might be busy on the phone, so if you make eye contact with him, he will start paying attention to you and the road.
